# ARESERP

Enterprise standard resource information management system to meet the needs of users in every industry.

## PURCHASING

Manage and control expenses to prevent high costs.

- Create purchase order/services/expenses etc.
- Approval through the system without printing.
- Notify when buying at the higher specified price.
- Automatically register an account by account code.
- View transaction history at any time.
- Many other efficiency abilities.

## SALES

Eliminate the problem of repeatedly filling out documents whether it's an invoice/bill or a delivery note, ARESERP can be completed immediately. You can track the status Real-Time and invoicing directly from the system. If the customer's payment deadline is reached, the system will alert able to charge the customer in a timely manner. In additional, ARESERP can also record that payments from customers via cash, transfer or checks to help your business close sales faster.

## FINANCIAL

**ARESERP** helps control cash flow effectively. Able to realize detailed product information since production buying, selling and other business activities instantly. Multi-currency function that reduces complexity from multi-currency transactions, convenience and fast, easy inspection and accurate processing values.

## INVENTORY

Receive, Store and Deliver goods efficiently by key-in data or scanning barcodes into **ARESERP** to store them in designated warehouses, able to determine which warehouse, which floor or which row, convenience to deliver goods to customers.

Professional Solution  
for your Business.

# ACCOUNTING

*Simple & Uncomplicated*

Reduce jobs of the accounting department that can automatically collect the financial information from all departments in the company to accounting without having to waste time arranging documents and manual entering information, enabling immediate review and approval.

## BUDGET MANAGEMENT

Track each department or projects how much budget has been spent as planned or not. As the data of each department is linked through ERP such as data from purchases, sales, inventories, production and other related information which allows supervisors to check at all times. Also if something goes wrong or doesn't go as planned, it can be adjusted and corrected immediately.

## PROJECT MANAGEMENT

Collects project cost data and profit/loss analysis to help operators achieve their **"Project Budget Control"**. Able to connect with other systems in the organization to manage the progress of work more easily. It is possible to view information in real-time, assist you to make decisions easier and faster how to develop or improve your business.

# PRODUCTION

Production planning system can be done right in the **ARESERP** without re-entering new product or warehouse data. The system will retrieve the information to create a bill of materials (BOM) to create a production planning, show production cost report and calculate suitable raw materials for production and forwarded to the production department to produce products as required. In this module, there are 3 main functions which are :

## **MRP (Material Requirements Planning)**

Plan production lines based on demand that is continually from the need of production such as items that need to be stocked on a regular basis.

## **MPS (Master Production Schedule)**

Plan items with direct demand, i.e. needs that come directly from the customer's needs. (or anticipated requirements) derived from sales orders, service orders, or forecasts.

## **Report Working Hours**

Detailed production process planning reports at every stage of production.

# RMA

## RETURN MERCHANDISE AUTHORIZATION

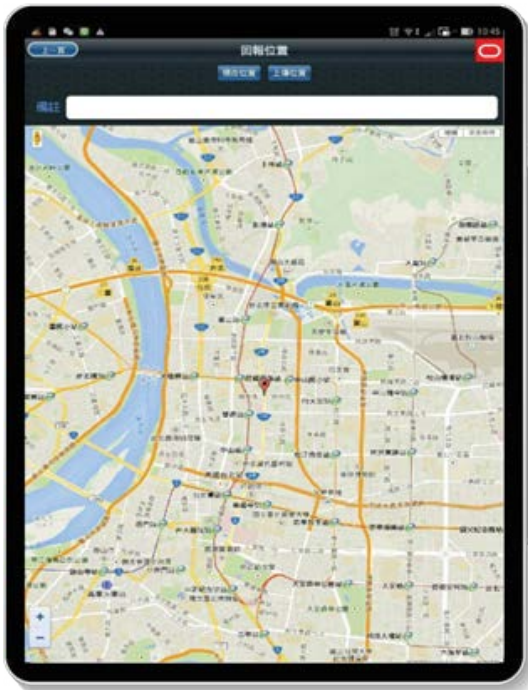

Able to inspect products with problems from the customer's return, if it is caused by the production of our company, we will exchange it for a refund or can be repaired during the warranty period. It can also control the production and delivery of goods as well.

# FAE

## FIELD APPLICATION ENGINEER

Technician tracking application able to follow up on the work of technicians. If they have to work off-site, they can also send documents to the head office or related departments immediately.

**RMA #**

**Online INV**

**Online transfer**

**Barcode scan**

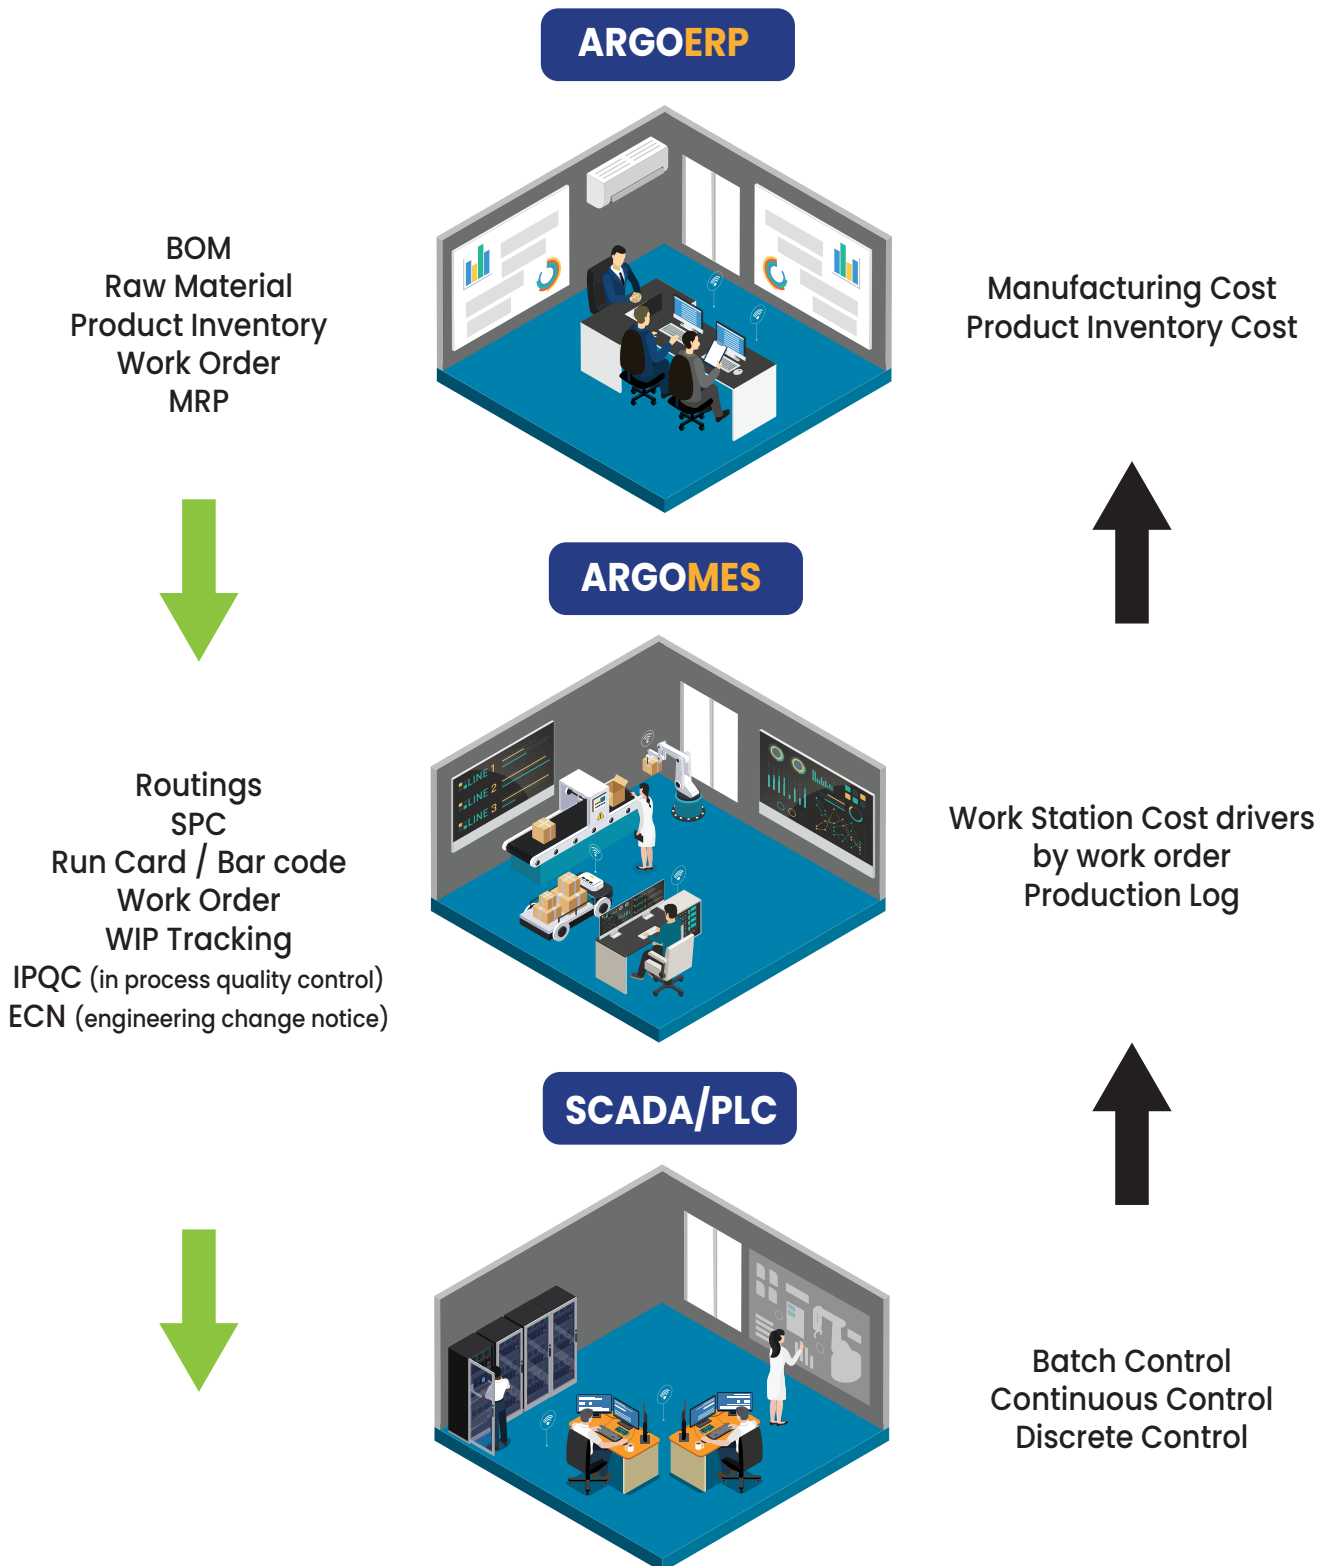

**Photo/ Signed**

**GPS clock in-out**

# ARESMES

## Manufacturing Execution System

Standards of manufacturing to meet the details of production in detail for entrepreneurs.

# BARCODE/QR CODE

## SCAN

Convenience and fast in working, no need to waste time typing data one by one anymore.

## Simply create label

Just retrieve information contained in the system, whether it is a label for attaching the material stick on the outside/inside of the box, etc. according to the organizational structure.
